Michele,

Unfortunately, I do not have knowledge about the names of the vendors as I am not involved in the vendor selection process. I think Damonica may be able to help you with this once she is back next week.

Thanks
Robin

Thanks very much Robin. Could you please provide EPA with the list of possible vendors. E-mail communication is fine.

Michele

Hello Michele,

Thanks for the e-mail. Damonica did request me to send you the revised pages of the application related to Mini-Frac injectivity test. I should be able to deliver this information by COB Wednesday, 7/14.

As for the seismic report, Lawrence Berkeley National Laboratory will most likely prepare the report. A final report will be written after the pilot project is completed.

C6 resources has identified a short list of possible vendors for the purchase of the CO₂.

Regards,

Robin Ozah

Subject: Follow up questions on C6 Resouces UIC Permit application

Hello Dan and Robin,

As DaMonica is out of the office, a few questions came up today in a meeting I could use your help with responding to:

1. Could you tell me when to expect your write-up for the mini-injectivity test - I believe it was to be submitted to EPA as a supplement or "changed pages" for your application?

2. The seismic report to be prepared following the pilot project which will present the results from the seismic monitoring array to be installed in the four 100 foot wells - who will be preparing that report? Will a final report be completed at the end of the pilot project, or will there also be interim reports?

3. Has C6 identified a vendor, (or narrowed it down to a couple of vendors) for the purchase of the CO2?

Thank you for your prompt attention.

Sincerely,

Michele
